

O Programa de Pós-Graduação em Estatística convida para:

WEBINAR

Machine learning, statistical learning and artificial intelligence

Palestrante:

Prof. Victor Leiva (PUCV-Chile)

DATA: 26/11/2020 (quinta-feira)

HORÁRIO: 14:00h (horário local de Brasília)

O seminário é público e poderá ser assistido pelo Link

<https://teams.microsoft.com/l/meetup-join/19.>

Resumo

This talk presents concepts, methodologies, and applications related to artificial intelligence based on data. The talk will focus on the concept of learning (machine, deep and statistical) discussing its methodologies and connections in a world of data. We will also talk about the four branches of digital transformation: the internet of things (IoT), data science/artificial intelligence, big data, and cloud computing, of great relevance today, including the digital opportunity that the COVID-19 pandemic is offering us.
